

Spaying or Neutering Is Good for  
Your Pet, For You and Your  
Community:

- Helps dogs and cats live longer, healthier lives. It can eliminate or reduce the incidence of a number of health problems that can be very difficult or expensive to treat.
- Eliminates the possibility of uterine or ovarian cancer and greatly reduces the incidence of breast cancer. Neutering eliminates testicular cancer and decreases the incidence of prostate disease.
- Makes pets better, more affectionate companions.
- Makes them less likely to spray and mark territory.
- Unsterilized animals often exhibit more behavior and temperament problems such as biting, wandering, or fighting.
- Animal shelters are overburdened with surplus animals.
- Eliminates the killing of unwanted litters/animals.

**PLEASE SHARE THESE  
LOW COST OPTIONS  
WITH PEOPLE YOU  
MEET!**

Just one unsterilized female cat and her offspring can produce 20,000 kittens in only 4 years.

Just one unsterilized female dog and her offspring can produce 4,000 puppies in only 7 years.

Reliable and valuable information is available for dogs, cats, hamsters and gerbils, birds reptiles. rabbits, fish and farm animals. Please know the basics and the commitment involved in order for your animal(s) to thrive.

### **ALWAYS REPORT ANIMAL CRUELTY:**
